FACT-CHECKING checklist

Surface level

- [ ] Check study sample sizes and methodology
- [ ] Check that all items match the right citation
- [ ] Review that each source is trustworthy
- [ ] Ensure all citation links work
- [ ] Ensure citations are not competitors

fine-tuning

- [ ] Review all match equations (within reason)
- [ ] Reread your interpretation. Does it still make sense?
- [ ] Is there any other interpretation for the data?
- [ ] Do you need to frame data differently?
- [ ] Are there any other interpretations of this data?

thorough checks

- [ ] Are there other studies that support your data?
- [ ] Can you interview experts to confirm data /interpretations?
- [ ] Is the source lacking context in the article?
- [ ] Can you provide facts to support first-person data?
- [ ] Are there conflicting, quality sources on the topic?

NOTES
